Academic

2026	*Post-Doctorate in theoretical computer science*, Reasoning up to equivalent representations in proof assistants Supervised by Hugo Herbelin at IRIF (Paris) in the Picube team.
2025	*Post-Doctorate in theoretical computer science*, Theory of quantum programming languages Supervised by Claudia Faggian and Thomas Ehrhard at IRIF (Paris) in the PPS team.
2021 - 2024	*PhD in theoretical computer science*, Identity of Proofs and Formulas using Proof-Nets in Multiplicative-Additive Linear Logic Supervised by Olivier Laurent at École Normale Supérieure de Lyon (LIP lab, Plume team).
2019 - 2021	*Master of fundamental computer science at École Normale Supérieure de Lyon*, a top ranking French school giving a research-oriented diploma
2017 - 2019	*Student at École Centrale de Lyon*, a top ranking French multi-field engineering school Main subjects: Mathematics, Computer science, Systems Control, Civil Engineering, Mechanic of Deformable Solids, Fluids and Energy, English and Management.
2015 - 2017	*Undergraduated intensive courses in Mathematics and Sciences* with English to enter top French schools by a nation-wide competitive examination at Lycée Chateaubriand (classes préparatoires)
2015	*High school diploma in Sciences* with highest honours at Lycée Saint-Martin in Rennes (France) Main subjects: Mathematics, Physics, Biology, Philosophy, History, English.

Productions

Published at a peer-reviewed international conference

FSCD 2026	*Quantum Bayesian Networks: Compositionality and Typing via Linear Logic* with Thomas Ehrhard and Claudia Faggian (23 pages).
FSCD 2025	*Yeo's Theorem for Locally Colored Graphs: the Path to Sequentialization in Linear Logic* with Olivier Laurent, Lorenzo Tortora de Falco and Lionel Vaux Auclair (18 pages). An extended version of this article has being submitted to LMCS, after invitation (57 pages).
FSCD 2023	*Type Isomorphisms for Multiplicative-Additive Linear Logic* with Olivier Laurent (48 pages).

Pending publication at a peer-reviewed international conference

CSL 2027	*No Uniform Interpolation in Linear Logic* (24 pages).

Published in a journal

LMCS 2025	*Type Isomorphisms for Multiplicative-Additive Linear Logic* with Olivier Laurent, revised and extended version of the namesake paper in FSCD 2023, submitted after invitation (80 pages).

Presented at a peer-reviewed international workshop

PS 2026	*Quantum Bayesian Networks: Compositionality and Typing via Linear Logic* with Thomas Ehrhard and Claudia Faggian (3 pages).
TLLA 2026	*Confluence Modulo and Undecidability of Cut-Elimination* (7 pages).
LIQCS 2026	*Quantum Bayesian Networks: Compositionality and Typing via Linear Logic* with Thomas Ehrhard and Claudia Faggian (6 pages).
TLLA 2025	*A Formalization of Multiplicative Proof-Nets in Rocq* with Olivier Laurent (6 pages).
TLLA 2023	*Sequentialization is as fun as bungee jumping* with Olivier Laurent, Lorenzo Tortora de Falco and Lionel Vaux Auclair (6 pages).
TLLA 2022	*Bottom-Up Sequentialization of Unit-Free MALL Proof Nets* with Olivier Laurent (8 pages).

Software Development

	Update and improve the Rocq plugin Relation Extraction, available at github.com/RemiDiG/RelationExtraction (work in progress but almost finished).
	Formalizing in Coq the proof-nets of multiplicative linear logic, available at github.com/RemiDiG/proofnet_mll (all proofs done, simplification in progress).

Recent talks

21/10/2026	*Splitting Idempotents via Interpolation in Multiplicative Linear Logic*, Days 2026 of the GT Scalp, Nancy.
10/09/2026	*Quantum Bayesian Networks: Compositionality and Typing via Linear Logic*, Proof Society 2026, Aussois.
22/07/2026	*Quantum Bayesian Networks: Compositionality and Typing via Linear Logic*, FSCD 2026, Lisbon.
18/07/2026	*Confluence Modulo and Undecidability of Cut-Elimination*, TLLA 2026, Lisbon.
24/06/2026	*No Uniform Interpolation for Linear Logic*, General meeting 2026 of the IRN LI, Lyon.

18/06/2026	*Quantum Bayesian Networks: Compositionality and Typing via Linear Logic*, LIQCS 2026, Paris.
22/05/2026	*Quantum Bayesian Networks: Compositionality and Typing via Linear Logic*, PPS Days 2026, Paris.
15/01/2026	*Semantics and types for quantum Bayesian networks*, Journées Informatique Quantique 2026, Bordeaux.
08/01/2026	*Confluence of Cut-elimination up to Rules commutations in Linear Logic*, Seminar Syntax Meets Semantics, Paris.
11/11/2025	*Bayesian Networks and Proof-Nets: the proof-theory of Bayesian Inference*, ArpiLYSM 2 School, Arpino.
29/10/2025	*Confluence of Cut-elimination and Rules commutations in Linear Logic*, Days 2025 of the GT Scalp, Vitry-sur-Seine.
09/10/2025	*Cut-Expansion in Proof-Nets of Multiplicative Linear Logic*, Joint seminar of the LCS and LDP groups, Lumini.
19/07/2025	*A Formalization of Multiplicative Proof-Nets in Rocq*, TLLA 2025, Birmingham.
18/07/2025	*Yeo's Theorem for Locally Colored Graphs: the Path to Sequentialization in Linear Logic*, FSCD 2025, Birmingham.
01/07/2025	*Identity of Proofs and Formulas in Linear Logic*, PPS Days 2025, Paris.

Teaching

2025	Co-Supervisor for Jérôme Evrard's M2[¶] internship.
2023 - 2024	Supervisor for labs and tutorials in the Computer Science. Courses: *Computer architecture* (L2[‡], 24h), *Logic* (L3[†], 32h).
2021 - 2023	Supervisor for labs and tutorials in the Computer Science. Courses: *Compilation and program analysis* (M1[†], 28h/year, 56h total), *Functional project* (L3[†], 32h/year, 64h total).

[¶] Université Paris Cité [†] École Normale Supérieure de Lyon [‡] Université Claude Bernard Lyon 1

Service

2026	*Co-Organizer* of the Journées PPS 2026 at IRIF.
2025	*Artifact reviewer* for POPL 2026.

Experiences

2021	*Master 2 internship* (6 months) on the formalization in Coq of proof nets, supervised by Olivier Laurent at École Normale Supérieure de Lyon. In the Yalla library on linear logic, formally define proof nets and prove some of their main properties, in the multiplicative fragment of linear logic.
2020	*Master 1 internship* (3 months) on C_5-coloring of P_8-free graphs, supervised by Paweł Rzążewski (University of Warsaw) and Édouard Bonnet (École Normale Supérieure de Lyon). Search for necessary and sufficient conditions for a graph without path of length 8 to be C_5-colorable. Bibliographic study on the methods used in similar cases, then adaptation.
2019	*Internship* (2nd year of engineer school, 3 months) at the insurance company AXA. Refactoring then improving a code for extracting information from databases for GAREAT (a group for reinsuring in case of terrorism). Use of SAS to manipulate data, in the complex framework of insurance rules.
2018 - 2019	*Research project* about reinforcement learning at École Centrale Lyon, supervised by Alexandre Saidi of the LIRIS laboratory. Study of reinforcement learning in a team of two, bibliographic research of the mainstream algorithms to find an optimal policy for a Markov decision scheme. Implementation in C++ and analysis of these algorithms in the case of a labyrinth containing rewards and punishments.
2018	*Internship* (1st year of engineer school, 1 month) at Mottaz Industrie. Full-time workman in the automobile field, whose duties included assembling and quality-checking.
2017 - 2018	*AI Programming project* at École Centrale Lyon, supervised by Benjamin Chouvion. Project in Python in a team of six for implementing a board game (Pingouins) during a year, rewarded by the second prize Francis Leboeuf. I was in charge of implementing several AI and I also did some modeling. Available at: `https://github.com/PingouinsECL/application`

Practical skills

Languages	French (mother tongue), English (TOEFL & CAE), German and Japanese both at beginner level.
Programming	Rocq, Ocaml, Python, Matlab, C++, SQL.
Tools	Git, LaTeX, Libre Office, Microsoft Office.
